

ARGIRELINE

botox-like

ESSENCE MARINE & BOTANIQUE LINE

bleu
&
marine
BRETANIA

Anti Expression Line Care:

- Although the active acetyl hexapeptide contained in Essence Marine & Botanique Line was developed for its action to prevent the formation of wrinkling due to over stimulation of the facial muscles, it has also been proven in clinical trials that the twice daily application will reduce already formed wrinkles up to 30%.
- Modulates the excessive stimulation of the facial muscles, relaxing facial tension and it also reduces the depth of already formed wrinkles.

Argireline - Acetyl hexapeptide-8 (formerly known as Acetyl hexapeptide-3)

This molecule, called Argireline, was developed by a private laboratory in Spain, in collaboration with a university research facility, and with partial funding by the Spanish Ministry of Science and Technology.

Exclusive anti-ageing and anti expression-wrinkle / lines face care

CREAM

Argireline Cream

bleu&marine uses an active ingredient which imitates the effect of botulin toxin but does not have a toxic effect, the hexapeptide Argireline. This peptide is intended to inhibit the extent of muscle contraction and thus relax facial muscles. Essence Marine & Botanique Argireline Cream Reduces the appearance of wrinkles as it effectively hydrates and energizes skin. It is abounding in protein and vitamin enriched, formulated to hydrate skin and terminate lines and wrinkles. A sure cure for aging skin.

How to use it? Apply over neck & face (day cream) or only over wrinkles and gently massage.

SERUM

Argireline & botanical DNA Serum

Ageing and environmental factors cause our skin to produce less and less collagen. It's collagen that actually supports the structure of our skin, making it firm and resilient.

bleu&marine Argireline & botanical DNA Serum has the unique ability to stimulate collagen production, allowing skin to regain lost vitality and slow the onset of further signs of ageing.

It reduces expression lines & deep furrows and firms, tones and increases skin elasticity.

How to use it?
Apply over wrinkles and gently massage.

Studies with human volunteers show that Argireline® delivers superior anti-wrinkle results, with the severity of wrinkles around the eyes decreased up to 17% after 15 days of treatment and up to 27% after 30 days of treatment. This represents a breakthrough in cosmetic science because of its remarkable speed in anti-wrinkle activity.

Both in vitro and in vivo methods of testing have been used; the in vitro testing confirmed the mechanism by which Argireline® is thought to modulate wrinkles, whereas the in vivo testing was used to determine the product's actual effectiveness against facial wrinkling.

In Beauty Center only

Myoxinol Mask

This anti-time peel-off mask acts at 2 levels: it reduces the contraction of the muscular cells which are responsible of the expression wrinkles and it stimulates the natural defences against the free radicals, responsible of the cutaneous ageing. bleu & marine use a biotransformed peptides from hibiscus seeds to develop a natural alternative to botulinum toxin injections. The flower is also an astringent high in Vitamin A, Vitamin C, and Vitamin E.

Myoxinol LS 9763 is claimed to smooth skin without causing side effects. Myoxinol is a patented complex of oligopeptides obtained by the bio-transformation of native proteins from the seeds of *Hibiscus esculentus* L. (okra).
